

# Additional Information for Concurrency Forum Meeting Participants

## Fermilab Site Access

You should access the Fermilab site through the “Pine Street” gate on Kirk Road if you are coming from the west (Batavia, Geneva, St. Charles), or the “Batavia Road” gate west of Route 59 if you are coming from the east (Warrenville, Naperville).

*The security guard will grant you access upon the presentation of a photo ID such as a Fermilab visitor ID, a driver license, or a passport.*

From the west, enter the lab through the Pine Street gate and drive straight. After a few curves through the woods, you will reach a stop sign and see on your left Wilson Hall, the main Fermilab building that resembles the Greek letter  $\pi$ . As you continue straight down the road you will drive over two bumps and see the CDF Collision Hall (orange) on your right with construction next to it (Figure 1).

Figure 1

Figure 2

At the stop, you keep going for about 100 m until you see a second entrance to the CDF site, framed by two large rocks on each side (Figure 2). As you turn right, you will see Building 327 in front of you. If the parking lot is full, go back to the main road and park across the street, on the east side of the industrial building (see “aerial view” map). The “CDF big room” is located on your left, as you enter Building 327.

From the east, enter the lab through the Batavia Road gate and drive straight after the first stop sign. Continue for about a kilometer and keep going straight after the second stop sign (Eola Road). Soon you will see a blue building with a couple of orange strips on your right, and an orange building with construction on your left (CDF Collision Hall) as in Figure 3. About 100 m before the stop sign at the CDF Collision Hall, you will see on your left an entrance to the CDF site, framed by two large rocks on each side (Figure 2). As you turn left, you will see Building 327 in front of you (Figure 4). If the parking lot is full, go back to the main road and park across the street, on the east side of the industrial building (see “aerial view” map). The “CDF big room” is located on your left, as you enter Building 327.

## **Lunch**

We recommend that we all have lunch at the Fermilab Cafeteria, in Wilson Hall, a 10 min walk from the CDF site. Due to construction and the possibility of bad weather, we have arranged for the Fermilab taxi (free) to take us to the cafeteria and back to CDF. Driving your own car to Wilson Hall is not recommended due to parking availability issues.

Lunch outside the Fermilab site is inconvenient given the short recess between sessions. If you still prefer this option, you may try a couple of restaurants in Warrenville, at the strip malls along Route 59, near the corner of 59 & Batavia Road.

## **In case you need to contact the local organizers on urgent matters ...**
